SMELLS AFTER A PPS VISIT?

IT'S NOTHING TO WORRY ABOUT...

Smells can sometimes occur after work on your pump station, this is totally normal. These will dissipate within 24-48 hours. Please use our free air freshener to help with the odour or simply feel free to hang it from your car's rear view mirror.

If the smell last longer than 5 days, there could be another issue with your pump station. If the seal in the manhole cover has perished, we would advise you employ a builder

to replace this as PPS do not supply or fit manhole covers/seals.

If the manhole cover has had sealant fitted prior to our visit, we will re-seal with clear sealant only. Please let us know if you'd like us to do this. If you would like us to seal your cable duct, this can be done at an additional price.

Any queries? Please call our Service Department on 01279 757 400.
